

MU-600 Essence PD Programmable Wi-Fi Thermostat

Product overview

The MU-600 is a PD Programmable Smart Digital Thermostat, controlled by either an **app on your smartphone** or can be directly controlled using the **easy press buttons**. The **clear LCD display** offers an easy to read screen.

With Whisper products there is **no need for an additional router**, simplifying installation, time, and cost. The globally recognised Smart Life plug and play app **makes install simple and fast**. MU-600 works comfortably with Smart home devices from Google, Amazon and Apple, grouping thermostats for single app control, and app control that can be family shared.

An **energy saving mode** is built in. This override gives end users a manual or timed set back function, automatically reducing set temperature to a pre-selected level at a selected time, ideal for holiday or vacant occupancy.

Can be used as a room or zone thermostat or to switch zone valves, manage electric underfloor and connect to underfloor heating wiring centres.

A **feature rich product**, including **open window detection** capability, a **button lock** to prevent misuse, and the ability to **set min and max** temperatures in regular use, ideal for children or vulnerable adults.

The programming offers **weekly planned cycles** with 5 working days and 2 separate weekend choices. Each day can be set to 6 cycles of on and off.

It has a **highly accurate** internal temperature sensor, adjustable in 0.5°C increments. Capable of supporting an **external sensor**, to be used as either overtemperature protection, or remote sensing away from the thermostat body.

Technical specifications

Item	230V programmable Wi-Fi thermostat	Max switching output	16A
Optional extra	Remote sensor probe (10K NTC)	Switched relay output	230V
Product code	CWS-PDW2-600	Settable temperature	5–35°C
Colour	White	Display accuracy	0.5°C
Material	ABS	Programming ability	1 Week (5+2), (6+1), (7 day)
Mounting	In wall (35mm backbox depth)	Connectivity	2.4GHz
Dimensions	86mm (H) x 86mm (W) x 15.6mm (D)	Protection rating	IP20
Weight	164g	Compliance	UKCA and CE
Power consumption	< 3W	Compatibility	Google, Amazon and Apple
Supply Voltage	230V
