INSTALLATION

Your thermostat is suitable for installation within a standard 86mm pattress box or European 60mm round pattress box.

1. Keep power off. Remove the mounting Plate.

 Connect power supply, load and external (floor) sensor into the appropriate terminals if there is external sensor.
 (see "Wiring your thermostat" for details and Fix the mounting plate into the wall with screws in the box.

 Fasten body of thermostat and the mounting plate through the groove.Installation complete.

RISK OF ELECTRICAL SHOCK. Disconnect/isolate power supply prior to making electrical connections. Contact with high voltage components can cause electrical shock, severe injury or death.

## WIFI CONNECTION & APP

To help with pairing your device for the first time, we recommend having your phone close to the router or modem

search "Smart Life" or "Tuya" Smart in your, or scan the QR code below

Open "Smart Life" app. Follow registration instruction

Through the app, you can control the devices with voice control by integrating amazon echo or google assistant. The app arrives with an easy to use interface with elegant features. As a result, using the app is extremely straightforward. One of the notable things about the app is you can control the appliances of your home from another part of the world.

The app also allows you to add and control a variety of devices at once. You can also let the device to automatically start or stop based on the location, time, and temperature. It also allows you to share the control of the devices amongst the family members. It also includes a real-time safety feature that will enable you to ensure the protection in case if anything went wrong.

#### How to use the Smart Life App

Smart Life will only work with the devices developed by the app manufacturer. Start with installing the app on your device. Then open the application and register for an account. Then the app will automatically detect your country code. In case it does not detect, you will require entering the code manually. Then you will need to enter your phone number or email address. There will be a verification code sent that you will require entering for confirming the registration.

Then click on the plus icon in the top right of the app to add a device. The app should automatically pair with the devices. In case you see a message that says failed to add, then it means the connection is not paired. You will require pairing with the app manually. After successfully pairing with the application, you can set the name of the device. Now you will be able to control the devices from your app interface.

#### **CONNECT TO WIFI – EASY PAIR**

1. Once your thermostat is installed and turned on it will automatically search for a device to pair with. The Wi-Fi symbol will repeatedly flash to indicate it is searching.

2.Open Smart Life app

3. Hold phone near Thermostat. Device will appear on screen.

4. Press 'Go to add'. Wi-Fi router and password.

5. When WI-FI is connected App will instruct you to select the device will be paired.

4. Select 'Small Home

Appliances' and find
